

Precision Converting Environmental Scope

We have determined the boundaries and applicability of our management systems and have considered the relevant internal and external issues identified in ISO 14001:2015 section 4.1 and organizational compliance obligations as identified in section 4.2, in addition to elements significant environmental aspects to the extent that they impact our activities, products, and services considering a life cycle perspective when establishing the scope. Top management has determined that all the clauses are applicable to our Environmental Management System. These items will be reviewed and updated as necessary during the annual Management Review meeting.

The environmental management system includes all activities and processes within the leased site boundary of Precision Converting West, located at 400 East Parkridge Ave Suite 101 Corona, CA 92879. Our operations are printing and converting through material slitting, multi-layer laminations, cutting through on of the following processes with rotary die, flatbed die, laser or knife and repackaging materials and products, not limited to films, foils, foam, rubber, pressure sensitive adhesives, tapes, and other materials used in the aviation, space, defense, automotive, medical, electrical, semiconductor and commercial industries. The scope of the EMS also includes all support processes which are under our control as a tenant, including administration, waste management, utilities usage, equipment maintenance, and EMS-related interactions with customers, suppliers, and other Hisco business units.

Precision Converting West is a dba of Hisco Inc., and this Environmental Management System only applies to the processes and interactions under our direct control at this facility. This includes direct authority over the procurement, manufacture, and shipping of our products. We do not directly design our products and may only influence the impacts of their use and application.

Additionally, as a part of Hisco Inc., we are provided support from other facilities that act in accordance with, and under the control of, this Environmental Management System. This system does not include other Hisco Inc. facilities outside of our control. Top Management at this facility has full authority for the conformance of this Environmental System, and we ensure that we can control all activities for which we have compliance obligations from our Interested Parties
