

Precision Converting Environmental Scope

When determining the scope for the environmental management system, top management takes into consideration the relevant needs of interested parties, including the organization's compliance obligations (4.2) the relevant external and internal issues (4.1) and significant environmental aspects to the extent that they impact our activities, products, and services considering a life cycle perspective. The EMS scope will be reviewed and updated as necessary during the annual Management Review meeting.

Precision Converting West provides custom fabrication products and application services to the Aviation, Space, Defense, Automotive, Medical, Electronics, Semiconductor, and Commercial Industries

Hisco Inc. dba Precision Converting West is the only site with ISO 14001 certification. It has the authority and ability to control and influence manufacturing and application services of products, and services performed by employees, contractors, internal Hisco sites, external providers, neighbors, and short-term visitors.

All activities, products and services of the organization within the scope shall be included in the environmental management system.

The scope shall be maintained as documented information and be available to interested parties.
