

## HISCO has the right solution!

### Lower costs by keeping inventory at the right levels

- Optimize your min/max levels
- Get notified before you experience stockouts
- Motivate the employees to be more accountable

### Maximize employee efficiency

- Eliminate or minimize stock room attendants' time on MRO
- Allow purchasing to focus on more mission critical items
- Lock down expired material and dispense older items first

### Take the pain out of managing your budget

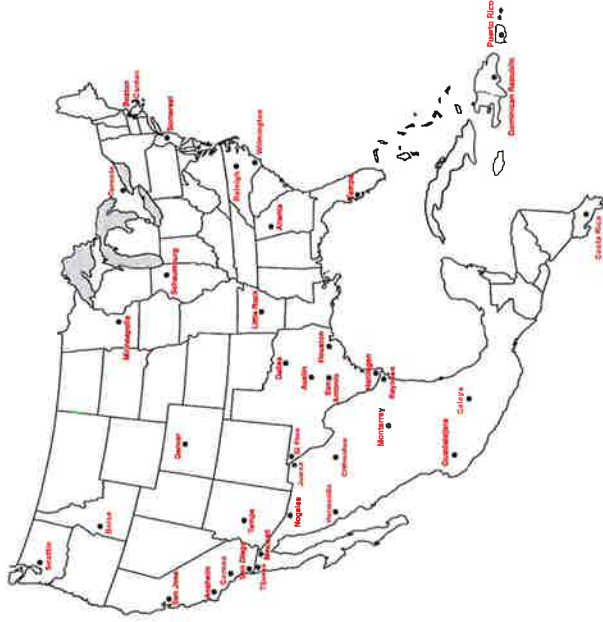

- Assign MRO costs to the correct employees, departments, & projects
- Receive a notification when stock hits critical levels
- Manage your expensive tools — know where your tooling is at all times with real-time information from any web-enabled device

**One size does not fit all!**

Fast Friendly Service

## Want to lower your MRO costs?

### Are your inventory & associated costs under control?

- Are you carrying too much inventory?
- Do you have stockouts that lead to costly emergencies?
- Do you suspect home migration or hoarding of some products?

### Are your processes effective?

- Is too much time spent managing MRO materials in the stock room?
- Are your procurement resources focusing on non-mission-critical materials?
- Is your current process to control expiration dates and FIFO working?

### Do you have real-time data on your MRO spend & inventory?

- Are you able to track the material being consumed?
- Are you automatically alerted when you are running critically low on inventory?
- Do you have an automatic way to track shared tools?

*HISCO's point-of-use vending solutions can help.*

*HISCO makes it easy to manage your MRO inventory.*

#### SmartDrawer

Choose who has access to each compartment and automatically lock down expired material.

#### SupplyBay

Easily manage high-volume materials dispensing.

#### SupplyChiller

Track use and access for all materials -- even ones requiring refrigeration.

#### SupplyPort

With SupplyPort, you can take advantage of an industry-leading, web-based data management system that provides data to any web-enabled device.
