

HiscoMex celebrates 16 years of operations in Mexico

Commemorating its anniversary in Mexico, Hisco/HiscoMex, North America's premier distributor of mission-critical materials, opened its new facility expansion in Tijuana, Mexico.

During an official event attended by commercial partners, company executives and industry leaders, HiscoMex inaugurated its facility expansion in commemoration of HiscoMex's 16th anniversary of operations.

"HiscoMex has kept a path of improvement and success thanks to the diligence, teamwork, excellent quality of service and efficiency of our employees and staff," said William Bland, Vice-President and Director of Sales of HiscoMex, during his welcome speech.

Bland said the change of facility was caused by HiscoMex's expansion into the medical and aerospace sectors. The company has strengthened the supply chain solutions offered in electronics, has consolidated the trading operations from the U.S., has increased its inventory capability and has maintained a vast variety of customized services for its clients.

For 12 years, Hisco/HiscoMex has been working in a Documented Cost Savings program that has helped customers to save more than \$100 million. HiscoMex stands out for the exceptional services that are offered to all its clients: international strength, local support, industry expertise, quality, reliability, high-quality products and excellent service, which gives HiscoMex a competitive advantage.

The new facilities are located at 9052-2 Siete Sur Ave., Ciudad Industrial de Otay. This is a 3,100 m2 space, an increase of 50% that allows duplicating the storage capacity.

"We are happy and thankful for the trust that our clients have given us during the last 16 years of operations; our commitment to our clients' satisfaction is the main reason for HiscoMex to pursue the excellence and vanguard," Bland said.

Product Distribution

As North America's lead distributor of mission-critical materials, Hisco offers more than 65,000 SKUs from over 1,500 partners. Hisco's product lines include: adhesives, sealants, silicones, abrasives, industrial tapes and more. For more than 16 years, Hisco has developed long standing partnerships with world-class suppliers that help them to provide the best products available in the market from brands that its customers know and trust. Hisco's supplier base includes: Alpha Metals, 3M, Loctite, Brady, Momentive, Berkshire, Lord, and many more industry leaders.

Services

HiscoMex's goal is to provide the best purchasing experience possible. For this reason, HiscoMex's services include: Vendor Managed Inventory (VMI), Vending, Adhesive Packaging, Precision Converting, E-commerce Solutions, Warehousing, Chemical Management, Product Training and more.

"We are a trusted provider that guarantees our services 24/7 all 365 days of the year. At HiscoMex, we share the same vision and commitment of offering the best service to our commercial partners," Bland said.

"We are a trusted provider that guarantees our services 24/7 all 365 days of the year. At HiscoMex, we share the same vision and commitment of offering the best service to our commercial partners."
