

# HERAL™

## High Performance Heat Exchanger Coating better, stronger, cleaner

- ▶ Single component, ready to use, no harsh chemicals.
  - ▶ Low viscous and transparent material.
  - ▶ Thickness less than one micron.
- ▶ Adheres strongly to substrates for longer lasting protection.
- ▶ Oleophobic, prevents adhesion of oil, dirt and inhibits fungal growth.
  - ▶ Self-cleaning through easy sliding of water droplets.
  - ▶ Could be applied inside and outside the surfaces/tubes.
- ▶ Passes more than 500 hours of salt spray test to impart corrosion protection to metals.
- ▶ High abrasion resistance and high thermal stability.
