Adhesive Materials Group
A DIVISION OF HISCO

Improve your bottom line with custom-engineered packaging solutions
IMPROVE YOUR BOTTOM LINE WITH CUSTOM-ENGINEERED PACKAGING SOLUTIONS FROM AdhesiveMaterialsGroup A DIVISION OF HISCO

WHAT IS AMG?
At Adhesive Materials Group we package, label and repackage epoxies, adhesives, silicones, acrylics, resins, greases and other specialty materials from world-class vendors such as 3M, LOCTITE, BONDERITE, AkzoNobel, WACKER, Elkem and LORD.

WHY AMG?
Our customized and cost-effective packaging solutions meet your application, storage and quality needs, all of which impact your bottom line.

Benefits of choosing AMG for your packaging applications:
☑ Increase productivity and production yields
☑ Material integrity and quality
☑ Accurate mix ratio and dispensing
☑ Extend shelf-life
☑ Improve worker safety
☑ Minimize labor and waste
☑ Lower your costs

3M  LOCTITE  BONDERITE  Elkem
WACKER  AkzoNobel  Parker  LORD
MATERIALS

ADHESIVES
AMG offers durable, one-component to two-component packaging for virtually any adhesive including:
- Acrylics
- Anaerobics
- Cyanoacrylates
- Epoxies
- Methacrylates
- Phenolics
- Polymides
- Resins
- Silicones
- Structural
- Urethanes
- UV Curables

The most common adhesive packaging types are dual cartridges, single-component, burst bags and syringes. For moisture-sensitive adhesives, we use nitrogen during the packaging process. This eliminates air and maintains adhesive integrity until it’s ready for use.

Some epoxies are pre-mixed and frozen when packaged to stop the curing process. End users then bring the frozen cartridges back to room temperature when they are ready for use.

SEALANTS
We create application-specific sealant packaging for all sealant types. Each high-performance packaging type is available for almost any industrial sealant such as:
- Acrylics
- Epoxies
- Polysulfides
- Polyureas
- Polyurethanes
- Rubber sealants
- Silicones
MARKETS
AMG’s expanded capabilities allow us to service a variety of industries with unique solutions to each specific application.

**Aerospace**
Designed for easy transport as well as moisture and heat resistance, AMG offers a range of options like vacuum packaging, nitrogen packaging, field kits and manual/pneumatic delivery options.

**Electronics**
AMG packaging systems for electronic-grade adhesives are designed to protect from contamination, moisture and heat to preserve the integrity of your formulations for long-lasting shelf life.

**Industrial**
AMG offers specialty industrial containment solutions to allow for easy transport, preserving the integrity of industrial-strength chemicals and thus extending shelf life.

**Medical**
Designed to provide secure, medical-grade bonds and seals, medical adhesives come in one and two-component systems and are carefully repackaged to maintain product integrity.
CAPABILITIES
With our broad portfolio of single- and dual-component repackaging solutions, AMG can match the demands of virtually any market or application.

One Component
- Caulk-Type Cartridges
- Tubes
- Jars
- Syringes
- Specialty Syringes
- Glass Jars
- Brush Top Bottles
- Plastic Bottles & Containers

Two Component
- Dual Cartridges
- Specialty Syringes
- Burst Bags
- Semkits
AMG is a division of Hisco, with 37 locations throughout the US and Mexico.
